

RAT SPRAY

Attractant spray for mice and rats

Characteristics

Non-toxic food attractant, designed for environments such as warehouses, supermarkets, food companies and in general wherever it is necessary to carry out a rapid containment of any murine infestations. Duration is between 7 and 10 days depending on the environmental parameters.

Target

Rattus rattus, Rattus norvegicus, Mus musculus.

Technical specifications

500ml can.

Aromas

- Hazelnut
- Anise

Mode of use

The attractive spray has a double function:

- attracts the target species towards a specific point or along a specific route, thus facilitating entry within the bait dispensers;
- improves the capture capacity of snap traps, glue plates and single or mechanical capture traps multiple.

They can also be safely used in food industries as they do not contain ALLERGENS inside them.

Packing

500 ml cylinders in boxes of 12 cans.

Code

811-NO for the nutty aroma

811-AN for the anise aroma

Note

For a correct use of the product, follow the instructions on the label scrupulously.
