

ERGOS MOBILITY

Mobile dummy

Technical concept:

Mobile dummy, made of stainless steel, to collect boar semen. Weight: less than 20 kilos.

Indicated for:

- Training of boars in quarantine.
- Collections in situ in the pen.

Advantages

Mobility:

- Built-in wheel for comfortable movement of the dummy on any surface or floor. A single person is able to move it long distances and without great efforts.
- Anti-puncture wheel (tubeless and made of resistant rubber).

Cleaning:

- Made of stainless steel, in the line of its predecessor Ergos, for greater hygiene.
- All surfaces are visible and easily accessible to prevent the buildup of dirt.
- Easy cleaning to access all surfaces with a simple flip.

Safety:

- Extra-stable legs to minimize the risk of overturning / accident for the operator or the boar.
- Non-slip surface and beveled edges for greater safety of the boar.
- Possibility of different storage positions to optimise spaces.

Versatility:

- Adjusted to the most common types of genetics.
- After thorough research, the width and the length of the base have been set to be able to use it for a wide range of boar weights.

TECHNICAL SPECIFICATIONS

Dimensions:	
Support surface for the boar:	85 cm long X 30 cm wide
Total height:	54,5 cm
Packaging:	91 x 50 x 56 cm
Weight	19 kg
