

# PACKAGING HOLDER

## Packaging container holder

### Technical concept

Container support to help achieve greater accuracy in packaging.

### Advantages

- Helps to make millilitre accuracy more consistent, especially in large volumes.
- The stand ensures that the container stays in the same position for all fillings.
- Stainless steel construction for easy cleaning, hygiene and durability.
- The liquid is at the same height as the pump, helping with liquid transfer, so the pump suffers less and the life of the pump is extended.
- Robust structure, suitable for holding large volume containers.
- Recommended for use with our Bagmatic N40 packaging equipment.
- It can be integrated with the recirculation pump.

8 Kg  
51 x 27 x 48 cm

9 Kg  
60 x 60 x 30 cm

REF: MPE004297
