## **USAGE**

Liquid extemporaneous preparation for professional use only

UDDER HYGIENE AFTER MILKING

TEAT DISINFECTION

Instructions:

GOLDEN MIX is manufactured by mixing (equal mixing ratios) with GOLDEN MIX base with GOLDEN MIX Activ'.

- Shake well the mixture before use in order to obtain an homogeneous solution (yellow orange color).
- Apply by dipping

When preparing the mix for extended storage prior to use, containers with the exact same capacity as the volume to be prepared should be used to limit the free volume that encourages the release of chlorine dioxide and gaseous chlorine.

When not all the prepared product has been used fully or is no longer usable, do not throw it away without firstly diluting it with large quantities of cold water.

Rinse the equipment, soiled surfaces and containers with cold water only before using them again.

GOLDEN MIX must be prepared for at most 2 milking to make sure of his efficiency
