

25W AC-DC Reliable Green Medical Adaptor

GSM25E series

Video

User's Manual

Features

- · 2 pole EURO plug , Class II power unit
- Medical safety approved (2 × MOPP) according to EN60601-1/-1-11
- · Extremely low leakage current
- No load power consumption<0.1W
- Energy efficiency Level $\,VI$ and meet CoC version 5 (except 5~9V for Level $\,V)$
- -25~+60 $^\circ \! \mathrm{C}$ wide range working temperature
- · Protections: Short circuit / Overload / Over voltage
- · LED indicator for power on
- Various DC plug quick adapter accessory available (Plug kit sold sperately, please refer to : <u>https://www.meanwell.com/upload/pdf/DC_plug.pdf</u>)
- · 3 years warranty

Description

GSM25E is a highly reliable, 25W wall-mounted style single-output green medical adaptor series. This product is equipped with a 2-pin (no FG) standard European power plug, adopting the input range from 80VAC to 264VAC. The entire series supplies different output voltages between 5VDC and 48VDC that can satisfy the demands for various kinds of miniature medical devices. The circuitry design meets the international medical standards ($2 \times MOPP$), having an ultra low leakage current (<50 μ A), fitting the medical devices in direct electrical contact with the patients.

With the efficiency up to 88% and the extreme low no-load power consumption below 0.1W, GSM25E is compliant with EU ErP and meet Code of Conduct(CoC) Version 5; the supreme feature allows the adaptor to save the energy when it is either under the operating mode or the standby mode. The entire series utilizes the 94V-0 flame retardant plastic case, providing the double insulation that effectively prevents electrical shock. GSM25E is approved with the international medical safety certificates.

■ Model Encoding GSM25 E 05 - P1J

DC plug type $\begin{cases} P1J : Plug for standard model, 2.1\psi \times 5.5\psi \times 11mm, c+, tuning fork type \\ Other options available by customer requested (see Page 4~5) \\ Output voltage \\ European 2 pin AC plug \end{cases}$

Applications

- Blood glucose meter
- · Blood pressure meter
- Nebulizer
- Inhaler
- Portable medical device

	PLUG	See page 4~5; Other type available by customer requested									
ONNECTOR	CABLE	See page 4~5; Other type available by customer requested									
NOTE	 See page 4-5; Other type available by customer requested All parameters are specified at 230VAC input, rated load, 25°C 70% RH ambient. DC voltage: The output voltage set at point measure by plug terminal & 50% load. Ripple & noise are measured at 20MHz by using a 12" twisted pair terminated with a 0.1µf & 47µf capacitor. Tolerance: includes set up tolerance, line regulation, load regulation. Line regulation is measured from low line to high line at rated load. Length of set up time is measured at first cold start. Turning ON/OFF the power supply may lead to increase of the set up time. Derating may be needed under low input voltage. Please check the derating curve for more details. The power supply is considered as an independent unit, but the final equipment still need to re-confirm that the whole system complies with the EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)
