

EASY DRINKER MINI

Drinking bowl for piglets in farrowing phase

The **Easy Drinker Mini** introduces piglets in farrowing phase to the consumption of water.

If piglets drink water in the farrowing phase, this increases the consumption of starter feed and improves their adaptation to water and feed after weaning.

FEATURES

- Easy for animals to reach.
- Bowl collects excess water.
- Nipple with long push button to reduce the force required for operation.
- Adjustable flow.
- Injected with highly resistant PVC.
- Distance to the floor: 5 - 8 cm.
- From 8 to 14 animals per drinker.

ADVANTAGES

- Smaller animals reach the water left in the bowl by the larger animals.
- Maximizes consumption while minimizing waste.
- Warm material that maximizes the number of animals that use it.
- Flow can be adjusted to the pressure of the installation to ensure that the animals are not frightened and do not get wet when the nipple is activated.
- Easy cleaning.

EASY DRINKER FLOW (L/min)

	WATER PREASSURE (bar)*				
	0,2	1,0	2,0	3,0	4,0
0,8 Ø adjustment hole (mm)	0,2	0,4	0,6	0,8	0,9
1,0 Ø adjustment hole (mm)	0,4	0,8	1,2	1,8	2,1
2,0 Ø adjustment hole (mm)	1,2	1,7	2,8	3,4	4,8

*We recommend using a pressure of 1.0 bar.
