

Spermax

Extenders

Magapor High Performance Extenders have been designed to preserve semen doses with maximum safety and offer the best results in terms of prolificity, fertility and viable piglets.

- The specific energy precursors included for the mitochondria improve sperm respiration and motility.
- A specific combination of biological buffers regulates and softens pH variations, maintaining the functionality of sperm cells.
- The membrane protectors in their formula and their high antioxidant capacity protect the sperm membrane against lipo-peroxidation.
- Unique membrane stabilizers prevent early sperm capacitation.
- Effective wide spectrum antibiotic combination in compliance with European Directive 90/429/EEC.
- Free of animal protein.

High performance extenders result from years of research, development and continuous improvement achieving the satisfaction of the most demanding users.

- Stronger protection against membrane lipoperoxidation thanks to a specific combination of next generation antioxidants.
- Wider spectrum antibacterial action.
- Prevention of early sperm capacitation under the most challenging situations.
- Maintenance of mitochondrial activity in optimal conditions for sperm interaction with the reproductive tract of the sow.

Spermax has exclusive antioxidants and energy precursors which maintain spermatozoa at their maximum vitality

at fertilization time and protect them during storage. Maximum energy for sperm and longterm protection for semen doses.

- Presentation: for 1, 5 and 100 Litres.

Box with extender for 1 Liter contains 6 cases with 25 sachets (150 sachets)

Box with extender for 5 Liters contains 60 sachets

Box with extender for 100 Liters contains 3 sachets
