

# MASTERBALLS

## Attractant balls for mice and rats

### Characteristics

Masterballs is a food attractant for rodents, non-toxic and completely free of allergens, in the form of gel spheres soaked in an aqueous solution that release a powerful aroma into the surrounding environment. With its aqueous formulation, Masterballs has an intense recall action against murids, who are able to perceive liquid sources at great distances. Masterballs, with its practical form in spheres, represents the ideal solution for a conjugated use with snap traps (Cod. 145-TR, 145-RA, 145-MI) with other capture devices, or to enhance the attractiveness of bonding devices.

Masterballs can be used in food companies, warehouses, supermarkets, storage platforms, mills, etc.

### Packing

400 gr bottle in boxes of 6 pcs.

### Code

810-NO for the nutty aroma

810-AN for the anise aroma

### Note

For a correct use of the product, follow the instructions on the label scrupulously.
