Bábolna Bio

Active ingredient: 0,005% (0.05 g/kg) bromadiolone

Ready to use extruded block, 25 gram hard pieces for rat and mouse control. Due to the second generation anticoagulant active ingredient content it is lethal even after one consumption.

Available size: 25 g.

Application dose:

for rat control:

- in case of small-scale infestation: 200 grams/10 metres in bait box
- in case of large-scale infestation: 200 grams/7 metres in bait box

for mouse control:

- 50g / 5 m² in bait box.

NO PROBLEM IS TOO BIG ...

EFFECTIVENESS

Fresh bait is shown to be more attractive to rats, and therefore required lethal doses are more likely to be ingested.

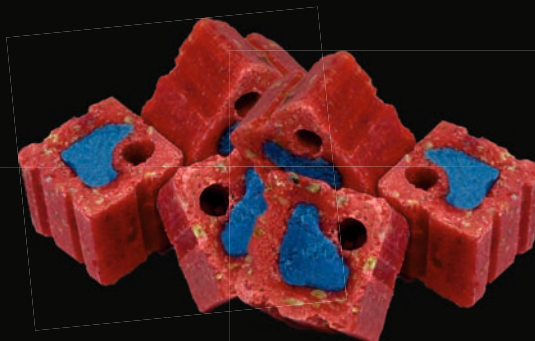

Better still, the drawbacks of scatter, the fact that rats can dissipate loose bait and the problem of greasy residues are all resolved with new **PROTECT SENSATION®**.

FRESH BAIT IN A BLOCK

A LETHAL COMBINATION

PROTECT SENSATION® 2 IN 1 RODENTICIDE BAIT

Bábolna Bio

PROTECT SENSATION® 2 IN 1 RODENTICIDE BAIT

Combining the effectiveness of fresh bait with the safety of a wax block.

PATENT Nr.:
EP 2806735
AU 2012367809
US 9,314,016

FRESH BAIT

Provides proven attraction to rats and rapid take-up

WAX BLOCK

Attracts rats to gnaw and keeps the fresh bait securely contained

FIXING HOLE

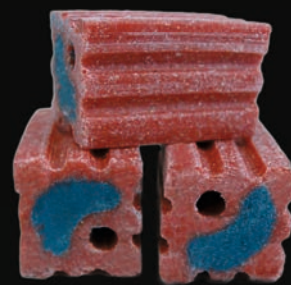

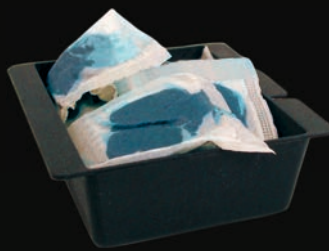

Ensures that rats can't remove the bait

ALL THE ATTRACTION OF FRESH BAIT IN A SECURE BLOCK FORMAT

PROTECT SENSATION® is a new and unique innovation – a 2 in 1 combination of fresh bait for better acceptance, safely contained in a wax block which rats cannot move.

The block component of the system appeals to rats' instinct to gnaw, and no scattering means treatment is clearly more economical, longer lasting and safer in sensitive applications.

Add the proven efficacy of fresh bait which attracts rats more readily, and new PROTECT SENSATION® equals better control, faster.

Use biocides safely.

Always read the label and product information before use.
