

Milk Heater - A02672

Components and description:

- Functional handle
- Control panel
- Pipe extension
- Heating capacity 3000 W
- Measurement ca. 90x17 cm
- Weight 7,5 kg
- IP 44
- Operating display
- Continuously variable control
- Voltage 230V , 50 HZ

The heater (immersion heater) made of high-quality stainless steel can heat milk and water as well as fruit mash and other substances to a constant temperature between 0 and 100°C. The stable design has extremely good stability and is easy to clean. Suitable containers for heating are milk cans and buckets.
